

## Prep 2: Observations

**Read about this in the research methods pack, then answer the following questions:**

1. What are the six different types of observational methods?
2. Explain the difference between naturalistic and controlled observations.
3. Explain the difference between covert and overt observations.
4. Explain the difference between participant and non-participant observations.
5. What are behavioural categories? Give an example of one if you were studying aggression.
6. What is time sampling?
7. What is event sampling?
