

Prep 4-animal studies

Read-learn-test

This is a different kind of prep! You will need to learn the animal studies, make revision notes and then will be tested on your learning all without even entering the classroom!

Activity one- Read and familiarise

Read through the two animal studies on pages 10-11 of the pack until you think you have a good understanding of how they were carried out and what they found

Activity two-Elaborate

You need to make some kind of revision material; flashcards, mind-maps on the studies. Try to break them down into-

Why study animals? What is the study called?

Method (**EXACTLY** what did they do, what were the different conditions)

Findings (**EXACTLY** what did they find)

Activity three-learn

Now using your revision notes you need to learn the detail of the studies. How? Cover them over and see if you can remember what's on the card, keep doing it until you can, get someone to test you!

These are the kind of questions you should be able to answer-

What animals were used? What were the conditions of the studies? How was the data recorded? What were ALL of the findings?

Activity four-test

Before the lesson you need to go to the Bhasvic VLE, to the attachment section and then do the multi-choice quiz called prep 4 animal studies. You can only attempt it once, it will be timed and the score will be sent to your teacher.

DO NOT ATTEMPT THE TEST UNTIL YOU REALLY KNOW THE STUDIES AS YOUR TEACHER WILL TAKE DOWN YOUR SCORE.
