

Prep 5 Explanations of attachment

Task one- Watch the clip on the website “kazza explains classical conditioning” and using it explain what the following terms mean. You can use the example from the clip about the dog if you like!

Unconditioned stimulus (UCS)-

UNconditioned response (UCR)-

Neutral stimulus (NS)-

Conditioned stimulus (CS)-

Conditioned response (CR)-

Bowlby’s Monotropic theory

Task 2-The monotropic theory

There are 6 “bits” to the theory. What is the acronym you can use to remember these “bits”. Write this in below and add in the 6 terms.

Now you need to find out about 3 of them. What are following and how did Bowlby use them to explain attachment?

Monotropy

Critical period (use page 16 as well for this)

Internal working model (use page 16 as well for this)
